

[the drain products leader]

the Dearborn
Difference.

At Dearborn, quality

means that installations

are fast, smooth and

permanent. Whether it's

a new design or an old

design, it's the best

design. That's part of the

"Dearborn Difference."

Here are some

more advantages of

doing business with

Dearborn Brass.

Dearborn Brass.

our reputation

The company that began in 1896 on Dearborn Street in Chicago has emerged as the Number One wholesale supplier to the plumbing industry. Dearborn Brass has thrived for more than 100 years because of the commitment of our employees to provide superior-quality products and value-added services at very competitive prices.

our brand

Dearborn Brass has grown to become the preferred choice of plumbing professionals. Today, the Dearborn Brass name is the most recognized brand, and our distinctive checkerboard design is the most recognized packaging in plumbing wholesale industry. Dearborn Brass®, Hoov-R-Line® and Wrightway® brands are the choice of professionals who know plumbing products.

our people

Cross-Functional Team Support. At Dearborn, serving our customers is a team effort. Sales, Customer Service, Marketing, Purchasing, Engineering, Quality Control, Manufacturing and outside Rep Agencies all work together to ensure that you, the customer, comes first.

Dedicated Sales Staff. Our sales associates are the best in the industry. Their collective knowledge of plumbing products and the distribution channel is unsurpassed in the industry. In addition, their dedication to Dearborn Brass and our customers is second to none.

Superior Customer Service Department.

Our Customer Service Department is focused to provide the best coverage, both domestically and internationally. With their experience and know-how, Dearborn's customer service staff is a key resource to many of our customers' businesses.

our products

Complete One-Stop Product Offering. Dearborn Brass has one of the most comprehensive product offerings in the industry. Whatever plumbing supplies you need, chances are we stock it. That means you only have one purchase order to write, one invoice to pay, and one sales force to deal with. You'll save time, money and headaches when you consolidate your business with Dearborn.

Superior-Quality Products. Most of Dearborn's plumbing products carry full certification for many of the national and regional plumbing codes and standards. Here, we offer a range of products to fit every price requirement...from professional-grade to value-grade. You can be sure that no matter what product you order, you will receive the best quality in that category, at the best possible price.

Innovative New Products. Dearborn Brass has long been an industry leader with the introduction of new products. We pioneered the category of plastic tubular in the early 1970s. Today, products such as our new NEXGEN™ toilet tank fill valve, clear vinyl toilet flapper, floor drains, grab bars, decorator-color basket strainers and bath waste products continue to boost our reputation as an innovator in the area of new product development.

Continuous Product Improvements. With the help of our customers, reps, salespeople and engineering staff, we continue to look for ways to "build a better P-trap." We have made improvements in all product categories—from brass and plastic tubular to bath wastes, and strainers.

our facilities

State-of-the-Art Manufacturing Facilities. At Dearborn, we have expanded our manufacturing operations to improve quality and to better serve our customers. With our new, 250,000-square-foot, state-of-the-art manufacturing facility, we have made a substantial investment in being the Number One plumbing supplier today and in the future. That investment includes all-new equipment—from cutting, threading and bending machines to annealers and platers.

National Distribution. A new Dearborn Brass distribution center was opened on January 2, 2001 to better serve our customers. This newest facility, located near Dallas, Texas, joins our existing distribution center in Las Vegas—as well as our rep warehouses in New Hampshire, Nashville and Los Angeles—to create one of the industry's top distribution networks.

Global Sourcing. We use only world-class suppliers to bring our customers the best quality products at the best possible pricing. We have established a network of suppliers from around the globe—a network that shares our commitment to superior quality and service to our customers.

Whatever your plumbing needs are, Dearborn can help. Before you buy from someone else, check out the "checkerboard." With Dearborn Brass, you'll find the quality, price and value you're looking for.

For the products that
pros prefer, there's
only one source. Call
Dearborn Brass first. Or,
